

JTB Brighter Earth Project

The **“JTBI Brighter Earth Project”** is a unique social initiative to support local environmental protection efforts and give participants an opportunity to come into contact with the history, culture and tourism resources within their community. Our aim is to bring clients, the local community and JTBI Group employees to create a brighter and promising future: Whether it’s cleanup at our favorite tourist spots or beautifying our local surroundings, through participation and interaction, together we learn more about our region’s culture, with the greater hope to “create a healthier community and deliver happiness” with everyone we encounter.

This will our sixth year **JTBI Canada Group** participating in the worldwide project! On August 24th , 2019, we will be doing shoreline clean up at **Granville Island Bridge and Ponds**

A little Information about

The Great Canadian Shoreline Cleanup became a national conservation initiative in 2002 and cleanups started appearing in every province and territory. By 2003, more than 20,000 volunteers were taking part. Public

support grew as Canadians became more aware of the harmful effects of shoreline litter on ecosystems, wildlife and people. In 2010, the Vancouver Aquarium began delivering the program with WWF-Canada, a strong partnership that continues today.

Itinerary and Info

WHEN: Saturday Aug 24th , 2019 9:30am

WHERE: Granville Island Duck Pond

ITINERARY:

9:15 – 9:45 Check in and Gathering at Granville Island picnic pavilion

11:50-12:00 Walk to Dockside Restaurant for lunch

12:00-13:00 Lunch at Dockside Restaurant

What to Bring & Wear

Please dress appropriately for the weather, remember to check the weather!

- **Footwear:** Good walking shoes if you do not mind getting wet or muddy, closed-toe solid outdoor footwear are recommended; no flip flops or sandals.
- **Clothing and Raingear:** There is always a chance of rain; cold and rainy = warm layers of clothing and appropriate rain gear. Please avoid bringing umbrellas as they will block the view of participants and may get in your way during the activity. Long sleeves and pants are always recommended as some people's skin may have a reaction to some plant species.
- **Hydration - Water and Snacks:** We will provide bottle water, however please feel free to bring your own environment-conscious and reusable water bottles and healthy light snacks.
- **Gloves and Tools:** The required equipment for cleaning activity will be provided on the spot by JTBI Canada
- **First Aid:** There is a staff from JTBI with OFA Level 2 first aid with the group and they will carry a first aid kit with them.
